

Griffith Park Urban Wilderness Petition

I join with the Los Feliz Improvement Association, Oaks Homeowners Association, Hollywood United Neighborhood Council, Equestrian Trails Inc., and a coalition of Griffith Park users in recommending that the final version of the Griffith Park Master Plan, currently in draft form, establish an Urban Wilderness in Griffith Park protecting its remaining open spaces. Current uses will not be affected by the designation, but the establishment of this protected zone will help ensure the survival of Griffith Park's natural eco-system — its indigenous plants and animals — and the continuation of its unique historic identity.

3900 West Chevy Chase Drive, Los Angeles CA 90039

The City of Los Angeles recently established an Urban Wilderness in Debs Park, near Highland Park. Griffith Park's greater biodiversity and historic significance make it an even better candidate for such a designation.

This conceptual map represents Griffith Park's open, undeveloped and natural spaces which would be protected by the Urban Wilderness designation.
